- Fight your fellow players: PLAYERUNKNOWN'S BATTLEGROUNDS is a multiplayer shooter that focuses on survival. At the beginning of each round, you are dropped from a plane and land at a random point on the map. On the field up to 100 players are next to you. Your goal is to survive the round as long as possible and eliminate as many opponents as possible. The last remaining player on the map wins the game.
- Move around: The difficulty of PLAYERUNKNOWN'S BATTLEGROUNDS is that the map gets smaller and smaller as the game progresses. A minimap on the edge of the screen will tell you which area the map will be limited to in the next few minutes. If you do not move quickly enough into the new play area, you may suffer damage.
- Wipe out enemies: To be the last to remain on the field, your opponents must of course be wiped out. There are many different weapons and pieces of equipment available to fight your opponents. However, it should be noted that all items must first be found on the map. At regular intervals also particularly strong weapons appear on the map. But beware: Your opponents also want to have this weapon, of course, in their inventory. Be quick and fight against your enemies.
- Multiplayer shooter: PLAYERUNKNOWN'S BATTLEGROUNDS can not only be played alone, but also in a team of two or four players.

Conclusion: PLAYERUNKNOWN'S BATTLEGROUNDS is an incredibly fast and sophisticated shooter with an addictive gameplay.
