****Rules of Survival - Features:****

- Survive as long as possible: The goal of Rules of Survival is to be the last survivor on the field. Since you are unarmed at the beginning of the game, and thus have no equipment, the search for weapons or other equipment is essential for you. Only then can you eliminate other players and ensure your survival. If you kill enemies, you can also take their weapons in your possession. However, if you are killed, the game is over for you.
- Solo vs. Team Mode: You can either play Rules of Survival alone or rely on the help of teammates in your struggle for survival. However, the teams cannot have more than 4 members. In addition, it should be noted that in team mode, a good strategy and a predetermined tactic are of great importance.
- Card shrinks: A special aspect about Rules of Survival is that the map gets smaller every few minutes. Thus, not only the combat area but also the zone you are safe in is getting smaller and smaller. Since the new play area could be far off your current location, you can use vehicles that will quickly take you to the new combat area.

Conclusion: Rules of Survival is one of the most popular Battle Royale games for mobile devices. The special game principle, meaning that the last survivor wins the game, ensures suspense and thrills. Since a total of 120 players can participate in the game, strategic thinking and good equipment are particularly important.
